Technical Skills

- Odoo Customization
- Python Programming
- API design and development
- AI Agent DevelopmentPrompt EngineeringLarge Language Models (LLMs)Retrieval-Augmented Generation (RAG)AI Workflow Automation
- DevOps

****Experienced ERP Odoo Technical Lead and AI Engineer**** with over ****8 years of experience**** designing, developing, and delivering scalable ERP and AI-powered enterprise solutions across multiple industries. Strong expertise in ****Python, Node.js, Odoo Framework, PostgreSQL, Microsoft SQL Server, REST APIs, LangChain, LangGraph, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), vector databases, and AI agent development****.

Proven experience architecting enterprise AI platforms, integrating AI services with Odoo and legacy software, and developing secure APIs and backend services using Python and Node.js. Skilled in building multi-agent workflows, tool-calling systems, semantic search, intelligent document processing, automated document classification, OCR-based data extraction, knowledge assistants, natural-language analytics, and AI-powered business process automation.

Experienced in deploying and managing LLM infrastructure, developing structured AI pipelines, implementing human-in-the-loop approval workflows, and establishing access controls, audit trails, monitoring, and AI governance. Proven ability to lead cross-functional development teams, translate complex business requirements into maintainable technical solutions, optimize system performance, and manage delivery from architecture and development through testing, deployment, and production support.

Passionate about building reliable, scalable, and secure AI-powered business applications, modernizing legacy systems, mentoring engineering teams, and applying intelligent automation to improve operational efficiency, decision-making, customer experience, and sustainable business growth.

Work history

2025-08 -
Current

Odoo Technical Lead/ AI Engineer

365 INFOTECH, Bangkok, Thailand

- Experienced Odoo Technical Lead with a strong balance of technical expertise and business understanding. Proven ability to design and deliver scalable Odoo solutions that align with client requirements, lead development teams, and solve complex technical challenges.

- Technological integration
- Code review expertise
- Version control
- Technical assessments
- Analytical skills
- Design development
- JavaScript programming
- PostgreSQL administration
- Linux administration

Project Management

- Requirements gathering
- Software lifecycle management
- Systems lifecycle management
- Agile methodology
- Project management
- Functional requirements

Leadership

- Project leadership
- Team leadership
- Mentoring

Client Relations

- Customer relationship management

Engineering Delivery

- Unit testing
- System integration testing

Languages

English

Myanmar

Passionate about code quality, system performance, and mentoring teams to achieve high-impact results.

- Planned and designed scalable, efficient Odoo solutions aligned with client business requirements
- Led development of custom Odoo modules, enhancements to existing features, and integrations with external systems
- Reviewed team code to ensure quality standards, best practices, and maintainability
- Designed and developed AI-powered business solutions by integrating Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and intelligent automation into enterprise workflows.
- Built AI agents and workflow automation solutions using modern AI frameworks, enabling natural language interaction, document intelligence, and business process optimization.
- Researched and evaluated emerging AI technologies, including LLMs, vector databases, agentic AI, and enterprise AI architectures, to deliver innovative and scalable solutions.
- Optimized application performance, database design, and system architecture for high availability and enterprise-scale deployments.
- Mentored developers on Odoo best practices, Python development, AI integration, software architecture, and Agile development methodologies.
- Analyzed and resolved complex technical issues, including system performance optimization
- Mentored and guided developers to improve productivity, technical skills, and team efficiency
- Collaborated closely with Project Managers to define project scope, requirements, and timelines
- Mentored junior developers through regular 1-on-1 meetings, providing guidance on best practices, coding standards, and career growth opportunities.

- Coordinated with cross-department teams like QA, DevOps, and Support to ensure seamless end-to-end software delivery process.
- Maintained close communication with clients throughout project life cycles for accurate progress reporting and prompt issue resolution.
- Enhanced system performance with thorough code reviews, debugging, and optimization techniques.
- Led a team of developers to successfully deliver high-quality software projects on time and within budget constraints.
- Evaluated and recommended new tools and technologies that resulted in increased development efficiency and up-to-date technical skillsets within the team.
- Implemented agile methodologies and promoted continuous integration and deployment practices, leading to improved team workflows.
- Coordinated with stakeholders to define project requirements, ensuring alignment with business goals and customer needs.
- Optimized resource allocation for projects, ensuring optimal use of team skills and minimizing project costs.
- Developed comprehensive documentation for software projects, simplifying onboarding process for new team members.
- Led successful launch of multiple software releases, meeting all project objectives and exceeding user expectations.
- Implemented automated testing frameworks, significantly increasing speed and efficiency of software development lifecycle.

2022-10 -
2025-07

Senior Odoo Developer

VCT Consulting (Thailand) Co., Ltd, Bangkok, Thailand

- Senior Odoo Developer with a solid track record of delivering scalable Odoo ERP solutions and leading technical implementations. Experienced in module development, system architecture, and third-party integrations.

Strong ability to understand business needs, guide technical decisions, and ensure high-quality, maintainable solutions. Passionate about performance optimization, clean code, and mentoring junior developers.

- Customized Odoo modules to meet client functional and technical requirements, ensuring alignment with business objectives
- Collaborated with Project Managers, Business Analysts, and clients to gather, analyze, and translate requirements into effective technical solutions
- Analyzed and enhanced existing Odoo modules to improve functionality, performance, and maintainability
- Designed and implemented new features and business workflows within Odoo
- Maintained comprehensive technical documentation, including module specifications and user guides, to facilitate knowledge transfer and support
- Provided technical support and troubleshooting for clients, ensuring timely resolution of system issues
- Continuously updated skills through training courses, workshops, and self-study—staying current on industry trends and emerging technologies.
- Debugged complex software issues, leading to a more stable product release.
- Collaborated with cross-functional teams to ensure seamless integration of new features.
- Participated in regular code reviews, ensuring high-quality standards were consistently met across all development efforts.
- Adapted quickly to new technologies and programming languages, enhancing overall team productivity.
- Reduced development time by creating reusable code libraries for future projects.
- Conducted thorough code reviews to ensure adherence to coding standards and best practices.
- Updated old code bases to modern development standards, improving

functionality.

- Designed customized solutions for proposals to potential customers.
- Collaborated on stages of systems development lifecycle from requirement gathering to production releases.
- Built databases and table structures for web applications.
- Designed and developed forward-thinking systems that meet user needs and improve productivity.
- Documented software development methodologies in technical manuals to be used by IT personnel in future projects.
- Corrected, modified and upgraded software to improve performance.
- Estimated work hours and tracked progress using Scrum methodology.
- Tested and deployed scalable and highly available software products.

2018-09 -
2022-09

Odoo Developer

Seventh Computing Co., Ltd, Yangon, Myanmar

- Experienced in delivering end-to-end Odoo development and customization across multiple business domains including ERP, CRM, HRMS, Manufacturing, Sales, and Accounting.
- Odoo Development across ERP, CRM, HRMS, Manufacturing, Sales, and Accounting modules
- Custom Odoo Development using Python, XML, and JavaScript - Odoo Customization & Configuration tailored to business requirements
- Custom Odoo Module Development and enhancement of existing modules
- Strong Functional Knowledge of Odoo business workflows and processes
- Odoo Project Management including requirement analysis and implementation planning -Database Management with PostgreSQL, optimization, and maintenance
- Third-Party System Integration via APIs and external services - Testing, Debugging, and Performance Optimization of Odoo applications

- Website Development and Odoo Website customization
- Successfully delivered projects within tight deadlines in fast-paced environments..
- Tested and ensured functional compliance of company products to meet quality standards.
- Developed comprehensive conversion and system implementation plans to ensure seamless transition.

2018-05 -
2018-08

Trainee Web Developer

Myanmar IT Consulting Co., Ltd, Yangon, Myanmar

- PHP Web Development Intern
- Developed user interfaces with modern JavaScript frameworks, HTML5, and CSS3.
- Collaborated with project managers and development team to generate innovative solutions for web projects.
- Used content creation tools and digital media to design websites.
- Conducted code testing and cross-browser testing to ensure quality assurance and enhance user experience.
- Supported web application development and gained hands-on experience in coding and system debugging.
- Collaborated with project managers and development team to brainstorm new ideas.
- Assisted with server management tasks to support optimal performance and reliability of hosted websites.
- Assisted with server management tasks, ensuring optimal performance for hosted websites.
- Fostered communication between designers and developers through participation in weekly meetings.
- Wrote custom HTML and JavaScript for existing websites.
- Developed testing code for web-based applications.
- Created and implemented custom HTML and JavaScript code to enhance functionality of existing websites.

- Increased site traffic by employing SEO best practices in content creation and meta-tag management.
- Designed and constructed optimized landing pages using HTML and CSS to ensure seamless integration and cross-browser functionality.
- Crafted SEO strategy and intuitive interface for the site to achieve prominent rankings across top browser platforms.

Education

2013-12 -
2018-08

Bachelor of Computer Science

*University of Computer Studies - Monywa,
Myanmar*

2019-10 -
2020-01

International Diploma in Project Management: OTHM, UK

Myanmar Figure Institute - Yangon, Myanmar

2019-10 -
2020-01

International Diploma in Strategic Business Management: OTHM, UK

Myanmar Figure Institute - Yangon, Myanmar

Accomplishments

Yoma Fleet Project

Collaborated as a Odoo Developer on the Yoma Fleet Project with a team of 5 members, implementing CRM, Fleet, Sales, and Accounting modules to improve fleet management and operational efficiency.

ABC Mall Project

Collaborated as a Odoo Developer on the ABC Mall Project with a team of 3 members, implementing CRM, Sales, and Inventory modules to enhance customer and stock management.

Myanmar Kaido Project

Served as Odoo Developer on the Myanmar Kaido Project with a team of 4 members, implementing CRM, Sales, Purchase, and Accounting modules to streamline business operations.

Myanmar Awba Project

Collaborated as a Odoo Developer on the Myanmar Awba Project with a team of 5 members, implementing CRM, Sales, Accounting, and Inventory modules to improve operational efficiency.

Orchid Pharmacy Project

Collaborated as a Odoo Developer on the Orchid Pharmacy Project with a team of 3 members, implementing Sales, Inventory, and Accounting modules to streamline pharmacy operations.

Autonova Service & Collision Repair Center Project

Collaborated as a Odoo Developer on the Autonova Service & Collision Repair Center Project with a team of 4 members, implementing Maintenance and Accounting modules to support repair operations.

Sagoseeds Microfinance Project

Collaborated as a Odoo Developer on the Sagoseeds Microfinance Project with a team of 5 members, implementing CRM, Accounting, and Website modules to improve customer and financial management.

Great Wall International Project

Collaborated as a Odoo Developer on the Great Wall International Project with a team of 3 members, implementing Accounting, Purchasing, and Inventory modules to strengthen operational processes.

Honda Myanmar Project

Collaborated as a Odoo Developer on the Honda Myanmar Project with a team of 4 members, implementing Sales, Purchase, and Inventory modules.

Alpha Power Engineering Project

Collaborated as a Odoo Developer on the Alpha Power Engineering Project with a team of 5 members, implementing Purchasing, Inventory, and HR modules.

El Dorado Bake House Project

Collaborated as a Odoo Developer on the El Dorado Bake House Project with a team of 3 members, implementing POS, Sales, Inventory, and Purchase modules.

Shwe Taung Myanmar Engineering & Construction Project

Collaborated as a Odoo Developer on the Shwe Taung Myanmar Engineering & Construction Project with a team of 6 members, implementing Sales, Accounting, Manufacturing, Inventory, and Purchase modules.

IEM Company Project

Collaborated as a Odoo Developer on the IEM Company Project with a team of 4 members, implementing Sales, Purchase, Inventory, and Accounting modules.

Sun Mobile IT & Electronic Project

Collaborated as a Odoo Developer on the Sun Mobile IT & Electronic Project with a team of 5 members, implementing Sales, POS, E-commerce, and Inventory modules.

Htun Myat Aung Property Development Project

Collaborated as a Odoo Developer on the Htun Myat Aung Property Development Project with a team of 3 members, implementing Sales and Accounting modules.

Joker Biscuits & Cookies Project

Collaborated as a Odoo Developer on the Joker Biscuits & Cookies Project with a team of 6 members, implementing Sales, Purchase, Expense, Inventory, Accounting, and Manufacturing modules.

Myanmar Distribution Group (MDG) Project

Collaborated as a Odoo Developer on the Myanmar Distribution Group (MDG) Project with a team of 4 members, implementing Sales, Purchase, Inventory, and E-commerce modules.

Fairdeal FMCG Distribution Project

Collaborated as a Odoo Developer on the Fairdeal FMCG Distribution Project with a team of 5 members, implementing Sales, Purchase, Inventory, and HR modules.

Skyway Myanmar Apparel Project

Collaborated as a Odoo Developer on the Skyway Myanmar Apparel Project with a team of 3 members, implementing Sales, Inventory, and HR modules.

Myport Limited Project

Collaborated as a Odoo Developer on the Myport Limited Project with a team of 4 members, implementing Inventory and Maintenance modules.

Medicare Myanmar Project

Collaborated as a Odoo Developer on the Medicare Myanmar Project with a team of 3 members, implementing HR module.

Padetha Distribution Project

Collaborated as a Odoo Developer on the Padetha Distribution Project with a team of 5 members, implementing Sales, Purchase, Inventory, and Accounting modules.

TOKYO Pipe Project

Collaborated as a Odoo Developer on the TOKYO Pipe Project with a team of 4 members, implementing Sales, Purchase, Accounting, and Inventory modules.

MOMO International Trading Project

Collaborated as a Odoo Developer on the MOMO International Trading Project with a team of 5 members, implementing Sales, Purchase, Inventory, and Accounting modules.

RENE Mattuas Myanmar Project

Collaborated as a Odoo Developer on the RENE Mattuas Myanmar Project with a team of 3 members, implementing POS, Sales, Inventory, and Accounting modules.

Sysnet System & Distribution Project

Collaborated as a Odoo Developer on the Sysnet System & Distribution Project with a team of 3 members, implementing CRM and Sales modules.

City Property Development Project

Collaborated as a Odoo Developer on the City Property Development Project with a team of 4 members, implementing Sales, Purchase, Inventory, and Accounting modules.

Saw Bwar Gyi Gone E-commerce Project

Collaborated as a Senior Odoo Developer on the Saw Bwar Gyi Gone E-commerce Project with a team of 5 members, implementing E-commerce, Sales, Purchase, and Inventory modules.

Live Plaza Myanmar E-commerce Project

Lead with a team of six staff members in the Odoo development of the Live Plaza Myanmar E-

commerce Project, implementing E-commerce, Sales, Purchase, Inventory, and Accounting modules.

TG Phone System Project

Collaborated as a Senior Odoo Developer on the TG Phone System Project with a team of 5 members, implementing Sales, POS, Inventory, Accounting, and E-commerce modules.

Djing Retail Ayutthaya Project

Collaborated as a Senior Odoo Developer on the Djing Retail Ayutthaya Project with a team of 3 members, implementing Sales, Inventory, and Accounting modules.

City Fresh Food Project

Collaborated as a Senior Odoo Developer on the City Fresh Food Project with a team of 4 members, implementing Sales, Purchase, Inventory, and Accounting modules.

GVS Recycling Project

Collaborated as a Senior Developer on the GVS Recycling Project with a team of 5 members, implementing Manufacturing, Sales, Purchase, Inventory, and Accounting modules.

TATO Contacts Project

Lead as a Lead Odoo Developer on the TATO Contacts Project with a team of 6 members, implementing E-commerce, Sales, Purchase, Inventory, and Accounting modules.

JAGTAR Thai Silk Project

Collaborated as a Senior Odoo Developer on the JAGTAR Thai Silk Project with a team of 3 members, implementing Sales, Accounting, and Inventory modules.

Indochina Development Partner Sole Lao Project

Collaborated as a Senior Developer on the Indochina Development Partner Sole Lao Project with a team of 6 members, implementing Manufacturing, Inventory, Purchase, Sales, Accounting, Expense, Employee, and Time Off modules.

Poysian Project

Served as Lead Odoo Developer for the Poysian Project with a team of 10 members, leading implementation of Sales, Purchase, Inventory,

Accounting, and Manufacturing modules to enhance operational efficiency.

TOA Paint (Thailand) Project

Led the Odoo implementation for TOA Paint (Thailand) as Senior Odoo Developer, managing a team to deliver integrated modules including Sales, Purchase, Inventory, Accounting, and Manufacturing, driving process optimization and enhancing overall operational performance.

The Cool Group Project

Served as Lead Odoo Developer for The Cool Project with a team of 5 members, managing implementation of CRM, Sales, Purchase, Inventory, and Accounting modules to improve system performance and business workflow.

The FireFocus Project

Served as the Lead Odoo Developer, leading a team of four developers to successfully implement and customize Odoo ERP solutions. Managed the implementation of CRM, Sales, Purchase, Inventory, and Accounting modules, ensuring seamless integration with business processes. Collaborated closely with stakeholders to analyze requirements, design solutions, oversee development, and support deployment. Improved operational efficiency, optimized business workflows, and enhanced overall system performance through tailored Odoo customizations and best practices.

Enterprise AI Platform

Led the architecture and development of an enterprise AI platform integrated with Odoo ERP and legacy business systems. Implemented Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI agents, and intelligent document processing to improve enterprise knowledge retrieval, workflow automation, decision support, and operational efficiency.

- Designed stateful and multi-agent AI workflows using LangGraph, including conditional routing, tool execution, retry mechanisms, conversation memory, human approval, and workflow checkpoints.
- Used LangChain to develop prompt pipelines, retrieval chains, tool integrations, structured

outputs, document loaders, text splitters, embedding workflows, and vector database connections.

- Developed an enterprise RAG solution that retrieves information from policies, technical documents, user manuals, historical records, and business data to generate context-aware and source-grounded responses.
- Integrated AI services with Odoo ERP through secure APIs and controlled tool-calling mechanisms, enabling authorized access to customers, sales orders, inventory, purchasing, accounting, and operational information.
- Connected the AI platform with legacy applications and Microsoft SQL Server using API services, ETL pipelines, scheduled synchronization, data mapping, validation, and reconciliation processes.
- Migrated enterprise master and transactional data from legacy databases while implementing batch processing, checkpoint recovery, audit logs, duplicate detection, and data-quality controls.
- Developed an AI-powered Web UI that allows users to interact with enterprise data through natural-language questions, document search, intelligent assistants, and automated workflows.
- Implemented automated document classification to identify and route invoices, purchase orders, contracts, receipts, delivery documents, HR records, and other business documents.
- Combined OCR and LLM-based extraction to capture structured information such as document numbers, dates, suppliers, customers, totals, tax amounts, payment terms, and line-item details.
- Created document validation workflows that compare extracted information against ERP records and route uncertain or conflicting results to users for review.
- Built semantic document search using embeddings and vector databases, allowing users to locate relevant information even when

their queries do not contain exact document keywords.

- Developed AI assistants for enterprise question answering, report summarization, document comparison, information extraction, and recommended next actions.
- Implemented intelligent query routing to select the appropriate knowledge base, business application, database, or external tool according to the user's request.
- Developed tool-enabled AI agents capable of retrieving live business information, preparing reports, checking transaction status, and initiating controlled workflow actions.
- Added automated email and support-ticket classification, including intent detection, priority assignment, sentiment analysis, response drafting, and routing to the appropriate department.
- Implemented contract and policy analysis features to summarize documents, identify key clauses, detect missing information, and highlight potential compliance risks.
- Developed automated meeting and operational-report summarization, including action-item extraction, responsible-person identification, and deadline detection.
- Added natural-language analytics capabilities that convert business questions into controlled data queries and return summaries, tables, and management insights.
- Implemented structured AI outputs using JSON Schema and Pydantic models to ensure predictable, validated, and system-compatible responses.
- Established role-based access control, record-level security, personally identifiable information masking, prompt-injection defenses, and human approval for sensitive write operations.
- Implemented comprehensive audit trails to record user requests, retrieved evidence, model responses, tool calls, approval decisions, and business-system updates.

- Deployed and managed AI infrastructure supporting model serving, embeddings, vector search, API gateways, background workers, and enterprise application integrations.
- Introduced monitoring and evaluation for response accuracy, retrieval relevance, latency, token usage, hallucination risk, system health, and workflow failures.
- Conducted pilot testing with stakeholders and end users, collected feedback, evaluated output quality, and refined prompts, retrieval strategies, and agent workflows before production release.
- Collaborated with business, functional, technical, infrastructure, and security teams to ensure the AI platform aligned with enterprise requirements and governance standards.
- Designed the platform as a modular and scalable architecture, allowing new AI agents, tools, data sources, models, and business workflows to be introduced without redesigning the entire system.
